

## Quick Start Guide

1. Load a pellet of herb into the heat chamber.
2. Rotate the vaporizer while evenly heating the herbs with tip of a flame.
3. Remove from heat after 10-30 seconds or when a you see a hint of vapor.
4. Inhale vapor through the mouthpiece. Repeat 2. - 4. until herbs are brown.

## Vapolution Pocket Vaporizer

## Features

The *Vapolution Pocket Vaporizer* is an all glass portable vaporizer that works with a windproof lighter to offer you the benefits of vaporizing anywhere you go!

## Benefits

Vaporizing is a much healthier way to ingest your herbs when compared to smoking. The oils of the plant are turned into an oil vapor that you inhale, while the plant fiber remains intact. By not burning the plant fiber, almost all toxins are eliminated!

**All Glass Means Pure Vapor**

## Pocket Vaporizer Detailed Instructions

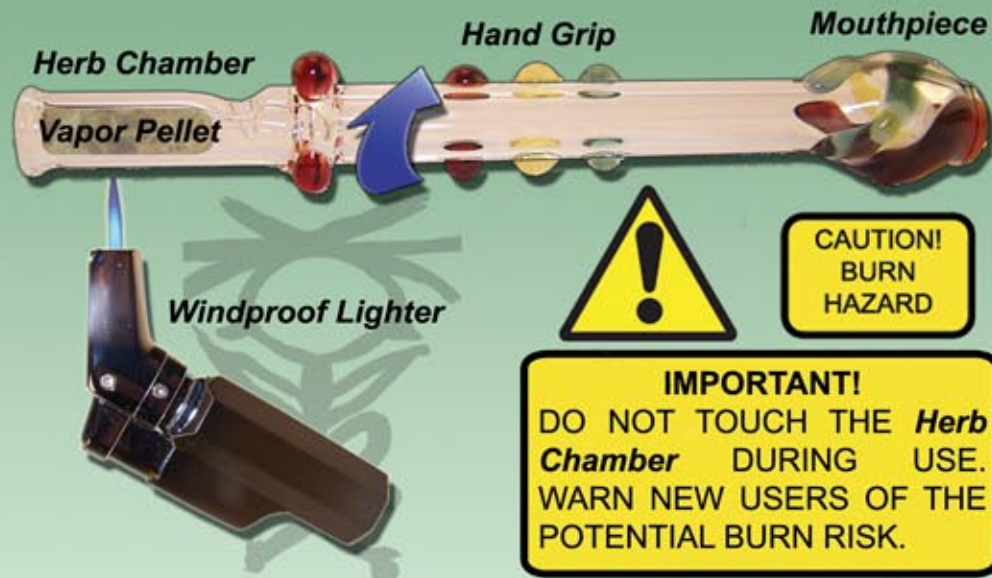

1. DO NOT GRIND YOUR HERBS. Break off 1 - 3 small plant pods. Give the herbs a squeeze and roll them between your fingers. Shape them into a **Vapor Pellet**. Gently slide the formed pellet into the **Herb Chamber**. Do not pack it too tight as good airflow is key.
2. Evenly heat the **Herb Chamber** with a **Windproof Lighter**. Hold the pocket vaporizer by the **Hand Grip** and rotate it slowly. Touch the tip of the **Windproof Lighter** flame to the glass. Heat the **Herb Chamber** for 10 - 30 seconds or until you see a hint of vapor.
3. Stop heating and slowly inhale vapor through the **Mouthpiece**. Re-apply heat to continue vaporizing until the herbs are a dark brown color or begin to taste smokey.

**DO NOT INHALE VAPOR WHILE HEATING!**

4. Discharge the spent **Vapor Pellet** by blowing through the **Mouthpiece**. Wait 30 seconds to 1 minute before reloading because the **Herb Chamber** will be very hot!
